

YARD WASTE DUMPSTER REMOVAL REQUEST

The Town of Winona Lake offers a program to aid *property owners* of the Town in disposal of unwanted botanical waste accumulated from clean up around their property. Because of limited resources to the Town, the Town will **not offer** this service to business owners and/or contractors. Business owners and contractors shall make their own arrangements for the removal of botanical waste.

The street department will, upon request and availability, deliver a dumpster to the property. **Allow 2 business days (48 hours) from request time to delivery.** The container may remain overnight on a weekday or over the weekend if delivered on Friday. You may load the container with **botanical waste (brush, grass, weeds, and tree limbs cut in 3' lengths, leaves, and dirt)**. Please do not overload the dumpster. All botanical waste must be contained inside of the dumpster. One dumpster a year per property owner will be free of charge. You may request an additional dumpster at a charge of \$75.00 each.

Because the State of Indiana governs the material deposited at landfill sites, specific items (tires, batteries, oil or other petroleum products, paint or paint cans, household chemicals, insecticides, herbicides, other hazardous waste and/or garbage/trash, construction material/treated lumber) **must not** be placed in any container to be handled by the Town. The Town may request that you remove from the dumpster any materials that are not botanical in nature. (NOTE: Botanical materials are those listed in parenthesis in paragraph 2 above.)

We recommend the property owner be present when the container is dropped off to show where the container is to be placed.

The charges shall be paid and the agreement signed before the delivery of the container. The signer shall pay the court costs and attorney fees that the Town incurs to collect such amounts or to enforce the terms of this agreement. **The Town of Winona Lake is not responsible for rutting or damage done by placement, dumping or removal of the container and will not fix or pay to fix ruts in lawn.**
